Product Description

This simulated bouquet is a good decoration for home decorations, with silk flowers as the main type. Its branches are plasticized with metal wire to ensure that the overall structure is strong and durable. Each flower is crafted from carefully selected silk fabric, giving the bouquet a realistic look and feel. The leaves are made of soft rubber leaflets, adding to the natural texture of the plant.

The unique feature of this product is the design of the metal wire branches, which allows the bouquet to be easily shaped into different shapes and curves to meet diverse placement needs. Whether placed in the living room, bedroom or dining room, it can inject a touch of natural beauty into the space.

At the same time, the over-plastic treatment of the metal wire ensures the stability and durability of the product, allowing it to maintain its beautiful appearance for a long time. This simulated bouquet showcases high-quality craftsmanship while bringing a long-lasting and charming addition to home décor.
